Scottsdale Center for Sight
REFRACTION PROCEDURE AND PRESCRIPTION FEES POLICY

Refraction is a procedure or test by which we determine the optimal eyeglass prescription for your eyes. It is used to determine if your current glasses are correct for your eyes or whether a new prescription is necessary.

Medicare does not cover this procedure. **If you decide you would like** a refraction procedure and an **eyeglass prescription**, there will be a fee of $25.00, which is collected at the end of your visit today. If you have commercial insurance we may bill it for you and if it is not covered you may receive a bill in the mail. The fee of $25.00 is only if there is a change in your prescription and you want to have the new prescription. If there is no change in the prescription that you are wearing from the new refraction there will be no charge.

You are under no obligation to have this refraction procedure performed. The choice is entirely yours.

PLEASE READ AND SIGN BELOW

I HAVE READ AND UNDERSTAND THE HOPE EYE CENTER POLICY ON A REFRACTION PROCEDURE.

_____I understand that if a refraction procedure is performed for eyeglasses today, I will pay a $25.00 fee.

_____I do not wish to have a refraction procedure or a prescription for eyeglasses performed today.

***PLEASE NOTE**: If it is determined after the refraction that there is no change in your eyeglass prescription, the $25.00 will be waived.

INFORMATION REGARDING DILATING EYE DROPS

Dilating drops are used to dilate or enlarge the pupils of the eye to allow the ophthalmologist to get a better view of the inside of your eye.

Dilating drops frequently blur vision for a length of time which varies from person to person and may make bright lights bothersome. It is not possible for your ophthalmologist to predict how much your vision will be affected. Because driving may be difficult immediately after an examination, it's best if you make arrangements not to drive yourself.

Adverse reaction, such as acute angle-closure glaucoma, may be triggered from the dilating drops. This is extremely rare and treatable with immediate medical attention.

I hereby authorize Dr. Paul M. Petelin, Dr. Stanley Shorb, and/or such assistants as may be designated by him to administer dilating eye drops. The eye drops are necessary to diagnose my condition.
